DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 5-15, 17, 19-24, 25 and 27-32 drawn to a method of isolating genomic DNA compounds and RNA, classified in class 536, subclass 25.4.
 - II. Claims 16, 33 and 34 drawn to a method of isolating genomic DNA compounds and kit therefore, classified in class 536, subclass 25.41+.

The inventions are distinct, each from the other because of the following reasons:

2. Restriction is proper if it can be shown that there are divergent methods/processes set forth to accomplish the same result or obtain the same product. Inventions I and II are related as two distinct processes for the isolation of genomic DNA, wherein the method of group II differentiates itself from that of group I via the inclusion of an immunomagnetic separation step which necessitates a divergent search from that of Group 1.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I, restriction for examination purposes as indicated is proper.

Art Unit: 1623

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
